1.0 DOCUMENT INFORMATION

1.1 Purpose

The System Requirements Document outlines the agreed system specifications. Once approved, it becomes the baseline to ensure the system meets business goals. Sign-off is required for development to start, and any changes must follow the System Enhancement Management process.

1.2 Intended Audience

The intended audience for this document includes project stakeholders and any team members involved in defining, implementing, or validating the system requirements.

1.3 Revision History

This section records all modifications to the document until it reaches Version 1.0, at which point it is finalized and established as the baseline for future reference. Once baselined, any new changes will be assessed based on their severity — significant changes may result in an addendum, while less critical updates may be handled through a formal change request.

Version No	Date	Revised By	Reason for Revision
0.1	23.07.2026 (Thurs)	Lim Yi Link	Initial Draft
1.0	23.07.2026 (Thurs)	Lim Yi Link	Send out for external review

1.4 Glossary of Terms

#	Abbreviation / Term	Interpretation / Description

1.5 Associated Document(s)

#	Item	Location / URL	Rationale for Relevance
1	EAINT-12055 — [eAuto-BackOffice] Exclude Resubmission Records from Reconciliation Listing	https://mfservices.atlassian.net/browse/EAINT-12055	Main internal tracking ticket for this requirement
2	CCB-867 — EAUTO | Exclude Resubmission Records from Reconciliation Listing	https://mfservices.atlassian.net/browse/CCB-867	Change Control Board ticket
3	EAUTO-991 — Enhancement of Recon Listing	https://mfservices.atlassian.net/browse/EAUTO-991	Source enhancement request ticket

2.0 REQUIREMENT

2.1 High-Level Requirement Overview

#	Item	Description
2.1.1	Enhancement Overview	Exclude a payment and its matched approved transaction from the Reconciliation Listing, even when the two fall on different dates.
2.1.2	Key Value(s) Expected	The listing shows only unmatched transactions, so matched pairs no longer appear as duplicate lines.

2.1.1 Assumptions

#	Assumption
1	A payment and an approved transaction are considered a matched pair when they share the same Payment Ref No.
2	For a matched pair, the Approved Amount in eAuto and the Payment Amount in RHB offset each other (one value against the other for the same reference).
3	The existing reconciliation matching logic remains unchanged apart from broadening the date comparison to allow different dates and cross-month matching.

2.2 Key Highlights and Baseline Requirements

The following key highlights and requirements were established during the initial sync-up sessions with the requestor. As this forms the baseline, any changes requested thereafter may result in adjustments to scope, timeline, or deliverables, for which the requestor will be responsible to review and confirm.

2.2.1 Background

#	Affected Item	Description
1	Project	eAuto
2	Portal	eAuto Back Office User Portal
3	Module	eAuto Recon Module (Reconciliation Summary Listing)
4	Request	Exclude matched payment-and-approved transactions from the Reconciliation Listing when they occur on different dates, including across months.
5	Additional Note	

2.2.2 Existing Issue & Expected Behaviour

#	Item	Description
1	Existing Issue / Behaviour	1. When a transaction is approved on a different date from the payment date into the RHB account, it appears as two separate lines in the Recon list. 2. Each of the two lines carries a different “Refund Required” value (e.g. one “Yes” and one “No”), even though the payment is already matched with the approved transaction.
2	Expected New Handling / Behaviour	1. The listing should not show a matched payment and approved transaction even when they occur on different dates. 2. The date matching should be broadened to also match across different months (e.g. payment on 30 July 2026 and approved transaction on 1 August 2026). 3. When the two transactions are matched, both are aborted (removed) from the listing.

2.2.3 Affected Pages

#	Affected Pages	Description
1	Reconciliation Summary Listing (Reconciliation Listing tab)	BackOffice page that lists reconciliation records filtered by Payment Date range and Transaction Type; the exclusion logic applies to the records shown here.

2.2.4 Reconciliation Summary Listing

#	Item	Description	Acceptance Criteria
1	Exclude matched payments	1. Once a payment is matched with an approved transaction, it will no longer be displayed in the listing. 2. Only unmatched payments or those requiring further attention will remain visible.	A payment that has been matched with an approved transaction no longer appears in the listing, while unmatched payments and those requiring further attention remain visible.
2	Match transactions across months	1. The system shall match a payment with an approved transaction even if the payment date and transaction approval date fall in different calendar months. 2. This ensures that valid matches across month-end periods are not missed. Example: A payment made on 30 July shall be matched with a transaction approved on 1 August.	A payment dated 30 July is matched with a transaction approved on 1 August, confirming that matches are made even when the dates fall in different calendar months.

#	Item	Description	Acceptance Criteria
3	Remove both matched records	Once a payment and an approved transaction have been successfully matched, the system shall remove both records from the reconciliation listing to prevent an incorrect Refund Required result from being displayed.	Once a payment and an approved transaction are matched, both records are removed from the listing and no incorrect Refund Required result is displayed for them.
4	Display unmatched transaction	The system shall continue to display transactions that do not have a matching payment, ensuring that all outstanding items remain visible for further action.	A transaction that has no matching payment continues to be displayed in the listing so that all outstanding items remain visible for further action.
5	Apply to existing records	1. Upon deployment of this enhancement, the system shall apply the same matching logic to existing records in the reconciliation listing. 2. Any payment and approved transaction that meet the matching criteria shall be automatically matched and removed from the listing.	After deployment, existing records in the listing that meet the matching criteria are automatically matched and removed.
