1.0 DOCUMENT INFORMATION

1.1 Purpose

The System Requirements Document outlines the agreed system specifications. Once approved, it becomes the baseline to ensure the system meets business goals. Sign-off is required for development to start, and any changes must follow the System Enhancement Management process.

1.2 Intended Audience

The intended audience for this document includes project stakeholders and any team members involved in defining, implementing, or validating the system requirements.

1.3 Revision History

This section records all modifications to the document until it reaches Version 1.0, at which point it is finalized and established as the baseline for future reference. Once baselined, any new changes will be assessed based on their severity — significant changes may result in an addendum, while less critical updates may be handled through a formal change request.

2.0 REQUIREMENT

2.1 High-Level Requirement Overview

#	Item	Description
2.1.1	Enhancement Overview	Standardise the transaction listing date fields with the payment report and introduce an insurance creation date reference in both the filter and the listing.
2.1.2	Key Value(s) Expected	Consistent date interpretation across the transaction listing and payment report, and clearer visibility of the insurance creation date for reconciliation.
2.1.3	Additional Note(s)	

2.1.1 Assumptions

#	Assumption
1	CIBO covers both eAuto and Secarang insurance transactions; this enhancement applies to the CIBO Transaction Listing across both.
2	From/Till date range validation follows the existing Transaction Listing filter behaviour; no change is introduced.
3	Insurance Creation Date / Insurance Created Date refers to the Payment Date Time (the date and time the payment is made).

2.2 Key Highlights and Baseline Requirements

The following key highlights and requirements were established during the initial sync-up sessions with the requestor. As this forms the baseline, any changes requested thereafter may result in adjustments to scope, timeline, or deliverables, for which the requestor will be responsible to review and confirm.

2.2.1 Background

#	Affected Item	Description
1	Project	CIBO
2	Portal	CIBO
3	Module	Transaction Management > Transaction Listing
4	Request	Rename the existing transaction date fields and add an insurance creation date filter and listing column.
5	Additional Note	

2.2.2 Existing Issue & Expected Behaviour

#	Item	Description
1	Existing Issue / Behaviour	Transaction Listing displays transactions by Created Date. Payment Report shows the same records by Insurance Created Date. The Business Owner faces difficulty when comparing both listings.
2	Expected New Handling / Behaviour	Rename the date fields to “Transaction Creation Date” (filter) and “Transaction Created Date” (column). Add an “Insurance Creation Date” filter type. Add an “Insurance Created Date” listing column aligned with the payment report.

2.2.3 Affected Pages

#	Affected Pages	Description
1	CIBO — Transaction Listing (Filter Panel)	Date range filter label updated and new “Insurance Creation Date” filter type added.
2	CIBO — Transaction Listing (Listing Table)	Column label updated and new “Insurance Created Date” column added.

2.2.4 Transaction Listing — Filter Panel

#	Requirement ID	Item	Description	Acceptance Criteria
1	EAINT-12151-REQ-001	Rename Filter — Transaction Creation Date	Rename the existing “Creation Date” date range filter to “Transaction Creation Date”.	Filter panel displays “Transaction Creation Date” in place of “Creation Date”; filtering behaviour is unchanged.
2	EAINT-12151-REQ-002	New Filter — Insurance Creation Date	Add a new date range filter type “Insurance Creation Date”.	A new “Insurance Creation Date” date range option is available in the filter panel and returns transactions by their insurance creation date.

#	Requirement ID	Item	Description	Acceptance Criteria
3	EAINT-12151-REQ-006	Filter Result — Insurance Creation Date	When the Insurance Creation Date filter is applied, only transactions that have an insurance created date are returned.	**Example 1: Transaction has an insurance created date within the selected range** → Included in the results. **Example 2: Transaction has no insurance created date (not yet approved)** → Excluded from the results.

2.2.5 Transaction Listing — Listing Columns

#	Requirement ID	Item	Description	Acceptance Criteria
4	EAINT-12151-REQ-003	Rename Column — Transaction Created Date	Rename the existing “Created Date” listing column to “Transaction Created Date”.	Listing displays “Transaction Created Date” as the column header in place of “Created Date”; values are unchanged.
5	EAINT-12151-REQ-004	New Column — Insurance Created Date	Add a new “Insurance Created Date” column positioned between “Transaction Created Date” and “UCD”.	Listing shows an “Insurance Created Date” column located between “Transaction Created Date” and “UCD”.

#	Requirement ID	Item	Description	Acceptance Criteria
6	EAINT-12151-REQ-005	Insurance Created Date — Display Rules	Define the display rules for the “Insurance Created Date” column value.	**Example 1: Transaction approved** → Shows the insurance created date in format DD-MM-YYYY HH:mm (e.g. 04-08-2026 23:59). **Example 2: Transaction not yet approved** → Shows “-”.

2.2.6 Transaction Listing — Export & Print

#	Requirement ID	Item	Description	Acceptance Criteria
7	EAINT-12151-REQ-007	Export (CSV) — Insurance Created At	The exported CSV includes a new “Insurance Created At” column, positioned immediately after the “Transaction Created At” column. All other existing export columns remain unchanged.	Exported CSV contains an “Insurance Created At” column directly after “Transaction Created At”; approved transactions show the date (DD-MM-YYYY HH:mm) and not-yet-approved show “-”.
8	EAINT-12151-REQ-008	Print — Insurance Created Date	The printed transaction listing includes the new “Insurance Created Date” column.	Printout displays the “Insurance Created Date” column with the same values shown on screen.

#	Requirement ID	Item	Description	Acceptance Criteria
9	EAINT-12151-REQ-009	Rename Export/Print Column — Transaction Created At	In the exported CSV and the printed listing, the existing “Created At” column is renamed to “Transaction Created At”, consistent with the listing column rename.	**Example 1: Export (CSV)** → Column header shows “Transaction Created At” in place of “Created At”. **Example 2: Print** → Column header shows “Transaction Created At” in place of “Created At”.
