# 1.0 DOCUMENT INFORMATION

## 1.1 Purpose

The System Requirements Document outlines the agreed system specifications. Once approved, it becomes the baseline to ensure the system meets business goals. Sign-off is required for development to start, and any changes must follow the System Enhancement Management process.

## 1.2 Intended Audience

The intended audience for this document includes project stakeholders and any team members involved in defining, implementing, or validating the system requirements.

## 1.3 Revision History

This section records all modifications to the document until it reaches Version 1.0, at which point it is finalized and established as the baseline for future reference. Once baselined, any new changes will be assessed based on their severity — significant changes may result in an addendum, while less critical updates may be handled through a formal change request.

# 2.0 REQUIREMENT

## 2.1 High-Level Requirement Overview

| # | Item | Description |
|---|---|---|
| 2.1.1 | Enhancement Overview | Introduce a new BackOffice module, Association Payment Listing, that automates association / vendor payment requests. The system records entries, produces a monthly summary listing and state-level details for the Ops team, and routes each month through a Drafter → Reviewer → Approver workflow with on-screen e-signature. |
| 2.1.2 | Key Value(s) Expected | Eliminates manual Excel compilation and cross-division effort; provides proper entry records and summary listings; digitalises the approval workflow with e-signature and audit trail; improves tracking and turnaround. |
| 2.1.3 | Additional Note(s) | Phase 1 covers Car and Motorcycle only. JomCheck is deferred to a later phase (liaised with Nurul on 23.07.2026). |

### 2.1.1 Assumptions

| # | Assumption |
|---|---|
| 1 | The approval sequence is fixed: Drafter → Reviewer → Approver. |
| 2 | The acting role is determined by the logged-in user ID (not selected manually). |
| 3 | Each role signs once; the signature is stored and reused for all future approvals. |
| 4 | Payment amounts are derived from the count of approved STMS, eSTM and APT transactions. |
| 5 | Only a future date may be selected as the Finance payment date. |
| 6 | Payment Request documents are generated only after all 3 roles have approved. |

### 2.1.2 Out-of-Scope

| # | Item | Reason |
|---|---|---|
| 1 | JomCheck payment listing and payment request | Deferred to a later phase (liaised with Nurul on 23.07.2026); Phase 1 covers Car and Motorcycle only |
| 2 | Actual disbursement / payment execution | Handled outside this module via the existing finance payment process |

| # | Item | Reason |
|---|---|---|
| 3 | Vendor bank account master data maintenance | Not part of this enhancement |

## 2.2 Key Highlights and Baseline Requirements

The following key highlights and requirements were established during the initial sync-up sessions with the requestor. As this forms the baseline, any changes requested thereafter may result in adjustments to scope, timeline, or deliverables, for which the requestor will be responsible to review and confirm.

### 2.2.1 Background

| # | Affected Item | Description |
|---|---|---|
| 1 | Project | eAuto |
| 2 | Portal | BackOffice |
| 3 | Module | New Module: Association Payment Listing |
| 4 | Request | Automate association / vendor payment requests with entry records, a monthly summary listing, an approval workflow, and payment request generation. |
| 5 | Additional Note | Phase 1: Car and Motorcycle only; JomCheck deferred. |

### 2.2.2 Existing Issue & Expected Behaviour

| # | Item | Description |
|---|---|---|
| 1 | Existing Issue / Behaviour | Ops manually exports approved STMS, eSTM and APT transactions, compiles them in Excel by vehicle and state, and reports the figures. The process is manual, cross-division and time-consuming, with no entry records or summary listing. |
| 2 | Expected New Handling / Behaviour | The system auto-calculates the monthly amounts by vehicle type and state and presents them to the Ops team as a summary listing with state-level details. Each month is approved through the Drafter → Reviewer → Approver workflow with e-signature, and the Approver records the Finance payment date. |

### 2.2.3 Affected Pages

| # | Affected Pages | Description |
|---|---|---|
| 1 | BackOffice Home — Reports menu | New menu item "Association Payment Listing" added under Reports. |
| 2 | Association Payment Listing — Summary | Monthly summary listing per year with amounts, workflow statuses and payment date. |
| 3 | Association Payment Listing — Details | Monthly state-level breakdown (Cars and Motorcycles), approval workflow, audit log and payment request download. |
