1. DOCUMENT INFORMATION

This section provides essential details about the System Requirements Document, including its purpose, scope, intended audience, and version history. It serves as a foundational reference for all stakeholders involved in the project, ensuring a shared understanding of the document's objectives and structure.

1.1 Purpose

The System Requirements Document outlines the agreed system specifications. Once approved, it becomes the baseline to ensure the system meets business goals. Sign-off is required for development to start, and any changes must follow the System Enhancement Management process.

1.2 Intended Audience

The intended audience for this document includes project stakeholders and any team members involved in defining, implementing, or validating the system requirements.

1.3 Revision History

The section records all modifications to the document until it reaches Version 1.0, at which point it is finalized and established as the baseline for future reference.

Once the document is baselined at Version 1.0, any new changes will be assessed based on their severity. If the changes are significant, an addendum may be created to address them. For less critical updates, a formal change request may be submitted, ensuring that all modifications are properly reviewed, approved, and documented while maintaining alignment with the original requirements and project objectives.

Version No	Date	Revised By	Reason for Revision
0.1	28.07.2025 (Mon)	Aishah Dhabitah Nor Azman	Initial Draft

Note: Update made to the document is highlighted in blue

1.4. Glossary Of Terms

This section defines key terminology and acronyms used throughout the document, providing clarity and ensuring a common understanding among all audiences of the document.

#	Abbreviation/ Terminology/Terms	Interpretation/Description
1	BO user	Back Office user
2	UCD	Used Car Dealer
3	PO	Product Owner

1.5 Associated Document(s) – if any

This section records essential information and recommends reviewing the following documents, as they provide valuable support and context for the contents of this document.

#	Item	Location / URL	Rationale for Relevance

2.0 REQUIREMENT

This section outlines the key specifications needed for the successful development of the system. It includes two main parts: *High-Level Requirements*, which summarize the project's goals and essential functions, and *Specific Requirements*, which detail the exact criteria and tasks the system must meet. Together, these components meant to provide a clear understanding of what is needed to guide the development process and align stakeholder expectations.

2.1 High Level Requirement

The section reflects the general requests of stakeholders while providing a broad overview and context for the project's goals without delving into detailed specifications.

High Level Requirement 2.1.1 [Secarang][Insurance] To onboard Zurich Takaful under Pemaju Eksklusif Sdn. Bhd. to the Secarang portal.

#	Item	Description
a	Problem Statement	a. Present handling Currently, Syarikat Takaful Malaysia is the sole Takaful provider for motor insurance on the Secarang portal. The available coverage types include Comprehensive and Third Party, Fire and Theft (TPFT). b. Reason for raising this request To enable Zurich Takaful as the insurance provider for motorcycle, private, and company vehicles on both the eAuto and Secarang platforms, replacing Syarikat Takaful Malaysia. c. Enhancement Required To enhance provider options, this enhancement proposes the onboarding of Zurich Takaful as the new

		Takaful provider for motorcycle, private, and company vehicles on both platforms, replacing Syarikat Takaful Malaysia. d. Benefit of implementing this enhancement Implementing this allows users greater insurer choice and access to Zurich Takaful's coverage, enhancing user experience, pricing competitiveness, and platform appeal while ensuring continuous Takaful availability.
b	Targeted Portal(s)	a. Secarang
c	Impacted Key Stakeholder(s) & Impact Description	a. Secarang user Primary reason: The enhancement will be implemented on Secarang.
d	Additional Note(s) - if any	Requirements for eAuto web portal and mobile app will be on another SRD.

2.2. Specific Requirement

The section offers a detailed breakdown of the high-level requirements, specifying the exact criteria and functionalities that the system must achieve to fulfil the enhancement's overall objective(s).

2.2.2.1: Specific Requirement > Secarang
