1.0 DOCUMENT INFORMATION

1.1 Purpose

The System Requirements Document outlines the agreed system specifications. Once approved, it becomes the baseline to ensure the system meets business goals. Sign-off is required for development to start, and any changes must follow the System Enhancement Management process.

1.2 Intended Audience

The intended audience for this document includes project stakeholders and any team members involved in defining, implementing, or validating the system requirements.

1.3 Revision History

This section records all modifications to the document until it reaches Version 1.0, at which point it is finalized and established as the baseline for future reference. Once baselined, any new changes will be assessed based on their severity – significant changes may result in an addendum, while less critical updates may be handled through a formal change request.

2.0 REQUIREMENT

2.1 High-Level Requirement Overview

#	Item	Description
2.1.1	Enhancement Overview	Introduce a new BackOffice module, Association Payment Listing, that automates association / vendor payment requests. The system records entries, produces a monthly summary listing and state-level details for the Ops team, and routes each month through a Drafter → Reviewer → Approver workflow with on-screen e-signature.
2.1.2	Key Value(s) Expected	Eliminates manual Excel compilation and cross-division effort; provides proper entry records and summary listings; digitalises the approval workflow with e-signature and audit trail; improves tracking and turnaround.
2.1.3	Additional Note(s)	Phase 1 covers Car and Motorcycle only. JomCheck is deferred to a later phase (liaised with Nurul on 23.07.2026).

2.1.1 Assumptions

#	Assumption
1	The approval sequence is fixed: Drafter → Reviewer → Approver.
2	The acting role is determined by the logged-in user ID (not selected manually).
3	Each role signs once; the signature is stored and reused for all future approvals.
4	Payment amounts are derived from the count of approved STMS, eSTM and APT transactions.
5	Only a future date may be selected as the Finance payment date.
6	Payment Request documents are generated only after all 3 roles have approved.
7	Car and Motorcycle transaction totals are counted based on the JPJ Approved Date.

2.1.2 Out-of-Scope

#	Item	Reason
1	JomCheck payment listing and payment request	Deferred to a later phase (liaised with Nurul on 23.07.2026); Phase 1 covers Car and Motorcycle only

#	Item	Reason
2	Actual disbursement / payment execution	Handled outside this module via the existing finance payment process
3	Vendor bank account master data maintenance	Not part of this enhancement

2.2 Key Highlights and Baseline Requirements

The following key highlights and requirements were established during the initial sync-up sessions with the requestor. As this forms the baseline, any changes requested thereafter may result in adjustments to scope, timeline, or deliverables, for which the requestor will be responsible to review and confirm.

2.2.1 Background

#	Affected Item	Description
1	Project	eAuto
2	Portal	BackOffice
3	Module	New Module: Association Payment Listing
4	Request	Automate association / vendor payment requests with entry records, a monthly summary listing, an approval workflow, and payment request generation.
5	Additional Note	Phase 1: Car and Motorcycle only; JomCheck deferred.

2.2.2 Existing Issue & Expected Behaviour

#	Item	Description
1	Existing Issue / Behaviour	Ops manually exports approved STMS, eSTM and APT transactions, compiles them in Excel by vehicle and state, and reports the figures. The process is manual, cross-division and time-consuming, with no entry records or summary listing.
2	Expected New Handling / Behaviour	The system auto-calculates the monthly amounts by vehicle type and state and presents them to the Ops team as a summary listing with state-level details. Each month is approved through the Drafter → Reviewer → Approver workflow with e-signature, and the Approver records the Finance payment date.

2.2.3 Affected Pages

#	Affected Pages	Description
1	BackOffice Home – Reports menu	New menu item "Association Payment Listing" added under Reports.
2	Association Payment Listing – Summary	Monthly summary listing per year with amounts, workflow statuses and payment date.
