1. DOCUMENT INFORMATION

This section provides essential details about the System Requirements Document, including its purpose, scope, intended audience, and version history. It serves as a foundational reference for all stakeholders involved in the project, ensuring a shared understanding of the document's objectives and structure.

1.1 Purpose

The System Requirements Document outlines the agreed system specifications. Once approved, it becomes the baseline to ensure the system meets business goals. Sign-off is required for development to start, and any changes must follow the System Enhancement Management process.

1.2 Intended Audience

The intended audience for this document includes project stakeholders and any team members involved in defining, implementing, or validating the system requirements.

1.3 Revision History

The section records all modifications to the document until it reaches Version 1.0, at which point it is finalized and established as the baseline for future reference.

Once the document is baselined at Version 1.0, any new changes will be assessed based on their severity. If the changes are significant, an addendum may be created to address them. For less critical updates, a formal change request may be submitted, ensuring that all modifications are properly reviewed, approved, and documented while maintaining alignment with the original requirements and project objectives.

2.0 REQUIREMENT

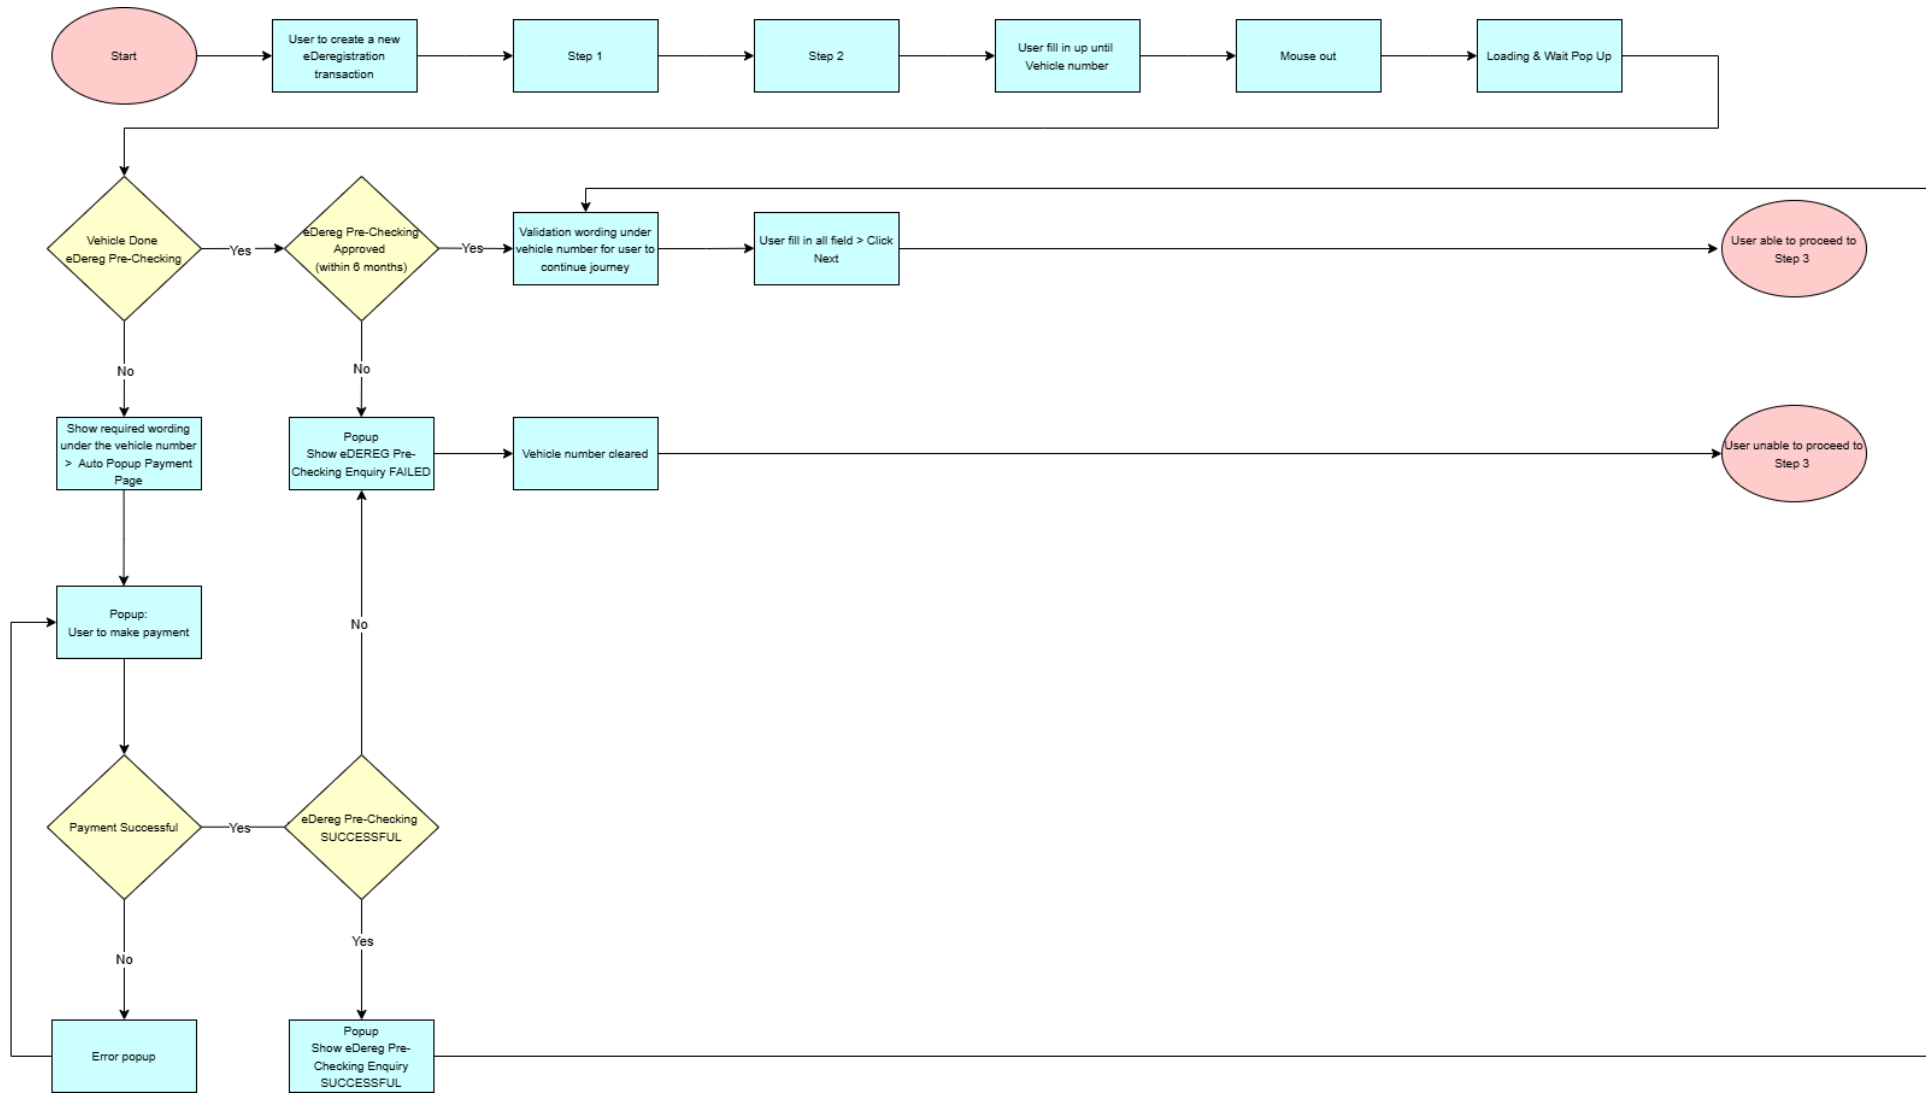

2.1 High-Level Requirement Overview

#	Item	Description
2.1.1	Enhancement overview	i. This enhancement will introduce a validation check during Step 2 when an AATF user creates a new eDereg transaction. The system will verify whether the entered vehicle number has been approved in the eDereg Pre-Checking listing. If the vehicle number is not approved, the system will block the user from proceeding to Step 3 and display an alert message instructing the user to complete the eDereg Pre-Checking transaction first. ii. By implementing this enhancement, AATF users are guided to complete the eDereg Pre-Checking process before creating an eDereg transaction. This ensures that only pre-approved vehicle numbers can proceed, preventing invalid or incomplete eDereg Pre-Checking to continue with the journey.
2.1.2	Key value(s) expected to derive from this enhancement	i. Ensures that every vehicle number goes through the eDereg Pre-Checking before a transaction can proceed. ii. Declined or unapproved vehicle numbers for eDereg Pre-Checking cannot be processed for eDereg, preventing invalid Dereistration.
2.1.3	Additional Note(s) - if any	

2.2 Key Highlights and Baseline Requirements

The following key highlights and requirements were established during the initial 1–2 sync-up sessions with the requestor. As this form the baseline, any changes requested thereafter may result in adjustments to scope, timeline, or deliverables, for which the requestor will be responsible to review and confirm.

2.2.1 High-level Workflow

2.2.2 eDereg Pre-Checking in eDeregistration Step 2

To be implemented eDereg Pre-Checking in Deregistration transaction during Step 2 at AATF Portal.

AATF user to create Deregistration transaction > Step 2: Key in vehicle number

- a. Approved eDereg Pre-Checking
 - i. Message: This vehicle is allowed to create eDereg transaction
 - ii. AATF user able to proceed to Step 3 and complete Deregistration transaction
- b. Previously Failed eDereg Pre-Checking / No eDereg Pre-Checking
 - i. Message: Approved eDereg Pre-Checking within 6 months is required to proceed
 - ii. Popup: eDereg Pre-Checking Enquiry (Payment)
 - iii. AATF user must complete eDereg Pre-Checking before proceeding to Step 3.

Notes: Failed eDereg Pre-Checking will not allow AATF user to proceed to Step 3.

2.2.3 eDereg Pre-Checking Validity Period

For eDereg Pre-Checking, system will detect validity of approved transaction of 6 months.

If the eDereg Pre-Checking exceeded the 6 months (Successful/Failed), AATF users must do the eDereg Pre-Checking again before continuing for eDereg transaction.

2.2.4 eDereg Pre-Checking Enquiry Declaration

#	Requirement ID	Item	Description	Acceptance Criteria
1	EAIN-9306-REQ-001	Declaration Display	Declaration is displayed at the top of the eDereg Pre-Checking Enquiry popup, above the Payment Summary.	Declaration is displayed above the Payment Summary when the eDereg Pre-Checking Enquiry popup is opened.
2	EAIN-9306-REQ-002	Declaration Wording	Wording of the declaration and the confirmation statement is as stated in Section 2.2.5.	Wording displayed in the popup matches Section 2.2.5, with the placeholders replaced by the values for the transaction.
3	EAIN-9306-REQ-003	Vehicle Number	Vehicle number in the declaration is non-editable.	Vehicle number is displayed as read only and cannot be amended in the popup.
4	EAIN-9306-REQ-004	Email Address	Email address in the declaration is editable, and is prepopulated from the email address stored in the database for the AATF company.	Example 1: Database holds an email address a. Field is prepopulated with the stored value, and AATF user is able to amend it before proceeding. Example 2: Database holds no email address

#	Requirement ID	Item	Description	Acceptance Criteria
				a. Field is displayed empty, and AATF user is required to key in the email address before proceeding.
5	EASINT-9306-REQ-005	Email Address Source	Email address used for prepopulation is maintained in the database only. Note: Company details page in the eAuto BackOffice Portal does not display the email address. A separate enhancement ticket is to be raised for the email address to be displayed and maintained in the company details page. Until the enhancement is delivered, the email address is required to be patched into the database by the development team. Note: As per checking in production, the email address maintained for Car Medic for eDereg Pre-Checking is edereg@carmedic.com.my.	Email address displayed in the declaration matches the email address held in the database record of the AATF company.

#	Requirement ID	Item	Description	Acceptance Criteria
6	EAIN-9306-REQ-006	Declaration Confirmation	Confirmation statement is displayed together with Cancel and Next, as stated in Section 2.2.5.	Example 1: AATF user clicks Next a. Acceptance of the declaration is recorded and the payment is submitted. Example 2: AATF user clicks Cancel a. Popup is closed and AATF user is returned to Deregistration Step 2.
