1. DOCUMENT INFORMATION

This section provides essential details about the System Requirements Document, including its purpose, scope, intended audience, and version history.

1.1 Purpose

The System Requirements Document outlines the agreed system specifications. Once approved, it becomes the baseline to ensure the system meets business goals. Sign-off is required for development to start, and any changes must follow the System Enhancement Management process.

1.2 Intended Audience

The intended audience for this document includes project stakeholders and any team members involved in defining, implementing, or validating the system requirements.

1.3 Revision History

The section records all modifications to the document until it reaches Version 1.0, at which point it is finalized and established as the baseline for future reference.

Once the document is baselined at Version 1.0, any new changes will be assessed based on their severity. If the changes are significant, an addendum may be created to address them. For less critical updates, a formal change request may be submitted, ensuring that all modifications are properly reviewed, approved, and documented while maintaining alignment with the original requirements and project objectives.

Version No	Date	Revised By	Reason for Revision
0.1	10.07.2026 (Friday)	Batrisyia Hasanah Binti Nursyamsi	Initial Draft

Version No	Date	Revised By	Reason for Revision
0.2	13.07.2026 (Monday)	Batrisyia Hasanah Binti Nursyamsi	Added file name for Invoice and e-Invoice
1.0	14.07.2026 (Tuesday)	Batrisyia Hasanah Binti Nursyamsi	To send out for external review
1.1	16.07.2026 (Thursday)	Batrisyia Hasanah Binti Nursyamsi	Updated changes based on discussion with team and Ops
1.2	24.07.2026 (Friday)	Batrisyia Hasanah Binti Nursyamsi	Updated changes based on discussion with team and Ops

Note: Update made to the document is highlighted in blue

1.4. Glossary Of Terms

This section defines key terminology and acronyms used throughout the document, providing clarity and ensuring a common understanding among all audiences of the document.

#	Abbreviation/ Terminology/Terms	Interpretation/Description
1	BO	Back Office
2	UCD	Used Car Dealers
3	SSM	Suruhanjaya Syarikat Malaysia – Companies Commission of Malaysia

#	Abbreviation/ Terminology/Terms	Interpretation/Description
4	e-Invoice	Electronic invoice issued in compliance with Malaysian LHDN requirements
5	CSE	Customer Support
6	Dermalog	Biometric device/unit used for thumbprint scanning
7	DP	Device Purchase

1.5 Associated Document(s) – if any

This section records essential information and recommends reviewing the following documents, as they provide valuable support and context for the contents of this document.

#	Item	Location / URL	Rationale for Relevance
1	CCB-832 – EAUTO Shopping Cart - Create Biometric Device Purchase Module	https://mfsservices.atlassian.net/browse/CCB-832	Jira ticket tracking this enhancement
2	EAINT-11880 –  [eAuto-UCD & BackOffice] Shopping Cart - To Create Biometric Device Purchase Module	https://mfsservices.atlassian.net/browse/EAINT-11880	Jira ticket tracking this enhancement
3	Figma – UCD Portal	https://www.figma.com/design/FzrjkY8WhaEZxyVI2JVzT3/eAuto-UCD?node-id=40614-142062&t=nfvK7iSn2CEWFllr-4	
4	Figma – BO Portal	https://www.figma.com/design/zD0wc012fHv6vLhyzsC2gK/eAuto--Backoffice?node-id=3174-12&t=Tk6RKyDSTT6N5U5v-1	

#	Item	Location / URL	Rationale for Relevance
5	EAIMT-10960 – [eAuto-UCD & BackOffice] Shopping Cart - To Create Software Installation Module	https://mfsservices.atlassian.net/browse/EAIMT-10960	Related Jira ticket – shares the Back Office Biometric Device Purchase & Software Installation Listing, module permissions, and Tx Status/cancellation logic with this document

2.0 REQUIREMENT

2.1 High-Level Requirement Overview

#	Item	Description
2.1.1	Enhancement overview	This enhancement will introduce a Biometric Device Purchase module under Proforma Invoice / e-Invoice in the UCD portal, allowing UCD to: 1. Book installation appointment (date + fixed time slot) 2. Receive confirmation/reschedule emails for the appointment
2.1.2	Key value(s) expected to derive from this enhancement	i. Streamlines UCD installation requests through a self-service booking flow with automated payment and invoicing. ii. Improves appointment management for CSE with slot capacity control, reschedule handling, and status tracking (Completed/Failed).
2.1.3	Additional Note(s) - if any	

2.2 Key Highlights and Baseline Requirements

The following key highlights and requirements were established during the initial sync-up sessions with the requestor. As this form the baseline, any changes requested thereafter may result in adjustments to scope, timeline, or deliverables, for which the requestor will be responsible to review and confirm.

2.2.1 Affected Modules (UCD Portal)

Service Hub

- i. Biometric Device Purchase Module
- ii. Service Request Listing
- iii. Service Request Details Page

2.2.2 Affected Modules (BO Portal)

Under Proforma Invoice / e-Invoice

- i. Biometric Device Purchase & Software Installation Listing
- ii. Service Request Details Page
- iii. Appointment Calendar Page

2.2.3 Module Permission

Back Office - Biometric Device Purchase & Software Installation Listing

- 1. Ops
 - Full access
 - Login ID:
 - a. kmcheah
 - b. jasons

- c. mfareed
- d. nikmuhamad
- e. eautosoyeng
- f. eautokelvin
- g. eautonurul
- h. eautozara
- i. mfizni

2. CSE

- Software Installation Transactions: Full access
- Biometric Device Purchase: View only for biometric-related fields (e.g. Update Shipping Details); CSE may act on the installation appointment bundled in a BDP transaction (reschedule / mark completed / mark failed), but cannot cancel a BDP transaction – cancellation is Ops-only
- Export: No access
- Login ID:
 - a. eautochinwei
 - b. eautohamal
 - c. eautojrjaya
 - d. eautoxiayuan
 - e. kokping
 - f. eautomie

UCD

1. Software Installation – All users
2. Biometric Device Purchase – Only main user

2.2.4 Flow

Step 1: UCD requests a new Dermalog unit via the UCD portal and provides the delivery arrangement – delivery address and authorized receiver.

Step 2: System prompts UCD whether no installation is needed, and also the option to add extra installations.

Step 3: UCD makes payment via RHB direct debit.

Step 4: If installation is opted in, UCD selects an appointment date (may refer to the Software Installation flow); if not, UCD proceeds directly to the request submission confirmation page.

Step 5: Upon receipt of the unit, the new installation SOP is triggered (if installation was opted in).

Step 6: The Biometric Device details in the Back Office will be updated accordingly.

2.3 Functionality Specification

2.3.1 Portal(s) Affected

#	Portal	Affected?	UI (if any)	Primary Reason(s) to be Affected	Module(s) affected	Remark (if any)

2.3.2 Input Field & Validation Specification

2.3.2.1 eAuto UCD Portal > Service Hub > Biometric Device Purchase Page

UI Reference: <https://www.figma.com/design/FzrjK8WhaEZxyVI2JVzT3/eAuto-UCD?node-id=40614-142062&t=nfvK7iSn2CEWFllr-4>

#	Item	Description
1	Step 1: Selection	The Biometric Device Purchase page shall display the following fields: 1. Purchased Devices – quantity selector (– / +); default quantity = 1, the (–) button becomes disabled once the count reaches 1. A numeric value can also be entered directly into the field. Displayed with the note "Each biometric device purchase comes with one free software installation." 2. Recipient Name – auto populate from Main User details name. Editable, auto capitalize, accept all characters, up to 200 characters. 3. Contact No – auto populate from Main User contact details. Editable, numeric input only, must follow the standard Malaysian phone number format. Similar to STMS Step 2 – Contact Details for Mobile No. 4. Shipping Address – "Ship to showroom address" checkbox, ticked by default. When ticked, the system auto-populates the showroom address (read-only). When unticked, the address field is cleared for UCD to manually key in the delivery address. Similar to STMS Step 2 – Contact Details for Address. 5. Button: i. Back – to return to the Service Hub. ii. Next – to proceed to the next step of the purchase flow.
2	Step 2: Payment Schedule an Appointment & Payment (Case 1: Free Installation Only)	On the Schedule an Appointment page, UCD selects the preferred software installation date and time slot (up to 3 bookings per slot), then reviews the Payment Summary before paying. Case 1 applies when UCD keeps the free installation only – the "I don't need software installation" checkbox is left unticked and no additional installation is added.

#	Item	Description
		1. Software Installation – [N] request(s) (RM 0.00/request); a quantity stepper (–/+) lets UCD select how many of the free entitlement to book, up to the number of units purchased, with the note "You are entitled to [N] free software installations" (one free installation per device). Default is the full entitlement; the (+) button is disabled once the count reaches the number of units purchased, and the (–) button is disabled at the minimum of 1 (at least one free installation must be requested). Note: Each software installation (free or paid) is valid for two (2) months from the purchase date (e.g. purchased on 10/10/2026 → valid until 10/12/2026); installations not booked within this period are forfeited. 2. Additional Installation – quantity selector (– / +); default quantity = 0 (none added). The (–) button becomes disabled once the count reaches 0. A numeric value can also be entered directly into the field. Info button opened once hovered with note: "One free installation is included with each device. Additional installations cost RM 54.00 each (RM 50.00 + RM 4.00 SST)." 3. Payment Summary: i. Biometric Devices – RM 850.00 × units purchased (e.g. 2 units = RM 1,700.00). ii. 2 Software Installation – RM 0.00 (covered by the free entitlement). iii. Service Tax 8% – RM 0.00 (no chargeable installation in this case). iv. Total Amount Payable (inclusive of Service Tax 8%) – equals the device subtotal (e.g. RM 1,700.00). 4. Button: i. Back – to return to the Biometric Device Purchase page. ii. Make Payment – displays a confirmation dialog "Sure to proceed with payment?" (Back / Next); selecting Next submits the payment via RHB direct debit. After successful payment, the appointment scheduling and installation flow follow the Software Installation module (refer EAINT-10960 – Software Installation SRD). If UCD proceeds without selecting an installation slot, the system goes directly to the Step 4: Submission page.

#	Item	Description
3	Step 2: Payment Schedule an Appointment & Payment (Case 2: Free Installation + Additional Installation)	Case 2 applies when UCD keeps the free installation and also adds one or more paid additional installations. 1. Software Installation – [N] request(s) (RM 0.00/request); a quantity stepper (-/+) lets UCD select how many of the free entitlement to book, up to the number of units purchased, with the note "You are entitled to [N] free software installations" (one free installation per device). Default is the full entitlement; the (+) button is disabled once the count reaches the number of units purchased, and the (-) button is disabled at the minimum of 1 (at least one free installation must be requested). 2. Additional Installation – quantity selector (- / +); default quantity = 0 (none added). The (-) button becomes disabled once the count reaches 0. A numeric value can also be entered directly into the field. Info button opened once hovered with note: "One free installation is included with each device. Additional installations cost RM 54.00 each (RM 50.00 + RM 4.00 SST)." UCD increases the quantity selector to the number of extra installations required (e.g. 2). Each additional installation is charged at RM 54.00 (RM 50.00 + 8% SST). 3. Payment Summary (example: 2 units + 2 additional installations): i. Biometric Devices – RM 1,700.00. ii. 4 Software Installation Fee – RM 100.00. iii. Service Tax 8% – RM 8.00. iv. Total Amount Payable (inclusive of Service Tax 8%) – RM 1,808.00. 4. Make Payment – displays a confirmation dialog "Sure to proceed with payment?" (Back / Next); selecting Next submits the payment via RHB direct debit. 5. Step 3: Appointment – after payment, UCD schedules appointment slots on the Schedule an Appointment calendar. Booking a slot is mandatory for every installation

#	Item	Description
		requested – both the free entitlement and any paid (additional) installation(s) selected in Step 2; UCD must book one slot per requested installation before proceeding. The calendar shows “Booked 0 of [total] appointments” (e.g. 0 of 4 for 2 free + 2 additional); a slot displaying “Full” is full and cannot be selected (up to 3 bookings per slot). The Confirm Appointment button will proceed once the slot(s) for the paid installation(s) have been booked; the free installation slots need not be selected to proceed as it is optional. Public holidays shall be disabled (greyed out) and shown in purple on the calendar; installation appointments cannot be booked on those dates. The list of public holidays will be based on Google Calendar. Note: Once UCD confirms the allocated slot, the system will lock the slot for 15 minutes. Note: Under Confirm Appointment, the message shall be displayed – “Your appointment for software installation is valid for 2 months from your purchase date.” (refer to SRD EAIN-10960 section 2.3.2.1 #6)
4	Step 2: Payment Schedule an Appointment & Payment (Case 3: No Installation Needed)	Case 3 applies when UCD opts out of software installation entirely – the “I don’t need software installation” checkbox is ticked. 1. Software Installation – when opted out, the Software Installation line is struck through (e.g. 2 request(s) (RM 0.00/request)) and the note “No installation appointment will be scheduled.” is displayed in red. The free installation entitlement is forfeited and cannot be claimed later. 2. Additional Installation – disabled/greyed out (0); no additional installation can be added while opted out. 3. Payment Summary (example: 2 unit(s)):

#	Item	Description
		i. Biometric Devices – RM 1,700.00. ii. Service Tax 8% – RM 0.00 (no chargeable installation). iii. Total Amount Payable (inclusive of Service Tax 8%) – RM 1,700.00. Note: the Software Installation Fee line is omitted from the Payment Summary in this case. 4. Make Payment – displays a confirmation dialog “Sure to proceed with payment?” (Back / Next); selecting Next submits the payment via RHB direct debit. 5. No appointment scheduling – as no installation is required, no slot selection is needed; upon successful payment the system proceeds directly to Step 4: Submission page.
5	Step 4: Submission	The Request Submitted (confirmation) page is displayed after the payment is submitted. 1. Success icon with the “Request Submitted” heading. 2. Message: “We have received your request and you will receive an email for confirmation.” 3. Biometric Device Purchase Details panel: i. Purchased Devices – number of units purchased (e.g. 2 unit(s)). ii. Recipient Name – the recipient name entered (e.g. ALI BIN ABU). iii. Contact No – the contact number entered (e.g. 0123456789). iv. Shipping Address – the delivery address (showroom address if “Ship to showroom address” was selected). v. Paid Amount – the amount paid for the installation(s) 4. Payment Details panel: i. Biometric Device – total amount paid for Biometric Device

#	Item	Description
		ii. Total paid – total amount deducted paid from RHB direct debit 4. Button: i. Done – returns UCD to the Service Request Listing.
6	Payment Failed (Examples)	If the RHB payment fails, the Payment Status is shown as “Failed” (in red) and the failure is recorded in the Payment History; failed attempts remain displayed for reference. Example: 1. Insufficient Funds (IF) – a dialog is displayed: “Wang di dalam akaun RHB anda TIDAK MENCUKUPI. 你的RHB银行余额不足.” The Payment History records the attempt, e.g. “01-06-2026 10:59am - RHB (260601000007) - Failed (IF - Wang di dalam akaun RHB anda TIDAK MENCUKUPI. 你的RHB银行余额不足.)”. UCD shall not be able to retry payment for this transaction – only a "Back" button shall be available to return to the Service Request Listing Page – and the transaction status shall be set to "Cancelled" (same behaviour as Software Installation).

2.3.2.2 eAuto UCD Portal > Service Hub > Service Request Listing

UI Reference: <https://www.figma.com/design/FzrjkY8WhaEZxyVI2JVzT3/eAuto-UCD?node-id=40865-7280&t=VqBaOMY6O9f27UHf-4>

#	Item	Description
1	Filter	A "Search & Filter" panel shall be displayed with the following criteria: 1. Reference No – free-text input. Similar as STMS Transaction No. behavior. 2. Service Type – dropdown selection; default "All". a. All b. Software Installation c. Biometric Device Purchase 3. Date Requested – date range picker: Date (From) and Date (To). Min 1 day, Max 1 month 4. Status – dropdown selection; default "All". a. All b. - c. Pending d. Completed e. Cancelled f. Expired Note: Status filter reflects Transaction Status (not Installation Status). "Failed" status previously existed but will no longer be hit – a same-date reschedule attempt is now blocked upfront by a validation error (refer to Tx Status Logic below) – so it has been removed as redundant. 5. Payment Date – date range picker: Date (From) and Date (To). Min 1 day, Max 1 month 6. Button: i. Search Now: To filter the listing based on the criteria entered. Similar as STMS Search Now behavior.

#	Item	Description
		ii. Reset: To clear all filter criteria back to default. Similar as STMS Reset behavior. Note: Text Field Validation – applies to ALL text fields in UCD and BO, including remarks: Accept: (1) all alphabetical characters (e.g. EAJNT); (2) all numerical characters (e.g. 1234); (3) all special characters (e.g. !@#\$%^); (4) all spacing applied (e.g. " spacing characters testing "). Block: (1) all Chinese characters (e.g. 测试); (2) all other non-English characters (e.g. Korean, Japanese). This exclusion applies to user-input fields only; system-generated display remarks (e.g. the RHB payment-failure message) may retain their original Chinese text. Quantity Field Validation – applies to all quantity/number-selector fields: accept integer values only; no additional maximum applies beyond the per-session appointment allocation caps (3 per session, 6 per day).
2	Listing Columns	The Service Request Listing table shall display the following columns: 1. # – running number. 2. Reference No – service request reference number. Format: • SR{Year}{Month}{6_digits_running_no} • e.g. SR67000001 3. Service Type – type of service requested (e.g. Biometric Device Purchase). 4. Date Requested – request date and time, DD-MM-YYYY HH:MM (e.g. 01-06-2026 10:25). 5. Payment – "OK" in green upon successful payment, "-" if no payment was made, "Failed" in red upon unsuccessful payment. 6. Tx Status – "Pending" in blue, "Completed" in green, "Failed" in red, "Expired", "Cancelled" and "-" in black. Tx Status Logic: i. "-" – as long as Payment is not yet "OK" or "Failed" (payment not completed).

#	Item	Description
		ii. Pending – remains Pending as long as at least one appointment is not in a final status (Completed or Cancelled); a Failed appointment is treated as non-final since it proceeds to the reappointment flow. iii. Cancelled – becomes Cancelled when all appointments are Cancelled, or when Payment = Failed (refer to Step 1: Payment – Payment Failed). iv. Completed – becomes Completed only when all appointments are in a final status (Completed or Cancelled) and at least one appointment is Completed. v. Failed – the only scenario that currently results in a Failed appointment status is when UCD attempts to reschedule an appointment to the same date as its existing scheduled appointment. This scenario is now prevented upfront: attempting to reschedule to the same date and time slot as the current appointment is blocked with the validation error "The new appointment date and time slot must be different from the current appointment." As a result, Failed is no longer expected to occur as a Tx Status and has been removed from the Status filter. vi. Expired – the only scenario that currently results in an Expired appointment status is when UCD has not claimed any type of installation within 2 months of purchase. For example, if UCD purchases on 6 July but does not book an installation slot, they may book or reschedule from 6 July until 6 September; the transaction shall be set to Expired on 7 September if still unclaimed. This is enforced by a daily scheduled job (cron) that flips eligible installation and transaction records to "Expired" once the 2-month window lapses; this logic applies to both Software Installation and Biometric Device Purchase transactions, whether the underlying installation is free or paid (refer to SRD EAIMT-10960 section 2.3.2.2). 7. e-Invoice Status – "OK" in green, "Failed" in red; "-" if not applicable. 8. Remarks – system remarks where applicable, e.g. e-Invoice failure ("TIN verification failed. Kindly provide correct TIN information to eAuto customer

#	Item	Description
		service."), same-day reschedule ("UCD rescheduled on the same day.") or failed payment ("IF - Wang di dalam akaun RHB anda TIDAK MENCUKUPI. 你的RHB银行余额不足."). 9. Action — refer to Action Column below. Note: The listing shall be sorted by the latest Date Requested first.
3	Action Column	The Action column shall display: 1. View — to open the Service Request Details Page of the selected request. 2. Reschedule — displayed only for Software Installation requests with Tx Status = "PENDING", to reschedule the appointment (refer to SRD EAIN-10960 2.3.2.1 #3). Note: When only some appointments within a transaction are rescheduled, the reschedule summary page and confirmation email display only the rescheduled appointment(s), not all appointments in the transaction. 3. Resubmit — allows the user to resubmit the booking if the page was accidentally closed during the process. Shown only on a paid-but-unscheduled row (Payment = OK, no appointment booked yet) and resumes the scheduling step; not shown on a failed-payment row.
4	Records per page	The listing shall display a maximum of 20 records per page. If no records are found, the listing shall display "No record found. Try again."

2.3.2.3 eAuto UCD Portal > Service Hub > Service Request Listing > Service Request Details Page

UI Reference: <https://www.figma.com/design/FzrjkY8WhaEZxyVI2JVzT3/eAuto-UCD?node-id=40865-6741&t=VqBaOMY6O9f27UHf-4>

#	Item	Description
1	Page Header	The page header shall display: 1. « Back button – to return to the Service Request Listing. 2. Reference No of the request. Format: • SR{Year}{Month}{6_digits_running_no} • e.g. SR67000001 3. Tx Status beside the Reference No – "Pending" in blue, "Completed" in green, "Failed" in red, "Expired" and "Cancelled" in Black.
2	Service Request Details	The Service Request Details panel shall display: 1. Service Type – type of service requested (e.g. Biometric Device Purchase). 2. Date Requested – DD-MM-YYYY HH:MMam/pm (e.g. 01-06-2026 10:50am). 3. e-Invoice Submission Date – e.g. 01-06-2026 11:00am. 4. LHDN Response Status – "OK" in green, "Failed" in red, "-" if not applicable. 5. e-Invoice Validation Date – e.g. 01-06-2026 11:00am. 6. Button: i. Invoice: To view/download the invoice. ii. e-Invoice: To view/download the validated e-Invoice.
3	Delivery Details	For Biometric Device Purchase requests, a Delivery Details section shall display: 1. Biometric Device – number of units purchased (e.g. 1 unit(s)). 2. Delivery Status – "New" in blue, "Arranged" in blue, "Delivered" in green.

#	Item	Description
		3. Delivery Order Number – refer to the generated delivery order number by system. Format YYYYMMDD/ DP001. (e.g. 20260713/DP003). Delivery order number will be generated once status updated to “Arranged”. Note: Before 12PM → today's date; after 12PM → tomorrow's date. The running number resets daily. 4. Consignment Number: displayed as read only text once keyed in by Ops; "-" if not yet arranged. 5. Delivery Date – refer to delivery date of the unit once BO user updated the shipping details there. 6. Shipping Address – the delivery address provided at checkout (or auto-populated showroom address when "Ship to Showroom Address" was selected). 7. Recipient Name – the recipient's name details provided at checkout. 8. Contact No. – the contact number of the recipients.
4	Appointment Details	For Biometric Device Purchase requests bundled with a software installation, an Appointment Details section shall display: 1. Number of Installations – total installation request (e.g. 2 request(s)). 2. Appointment – number of appointments booked (e.g. 4 booked). 3. Appointment table with the following columns: i. # – running number. ii. Appointment Date – DD-MM-YYYY (e.g. 16-06-2026). iii. Time Slot – the booked time slot (e.g. 10:00am – 12:00pm). iv. Status – “Pending” in blue, “Completed” in green, “Failed” in red, “Cancelled”, “Expired” and “-” in black. v. Reason – shown where applicable (e.g. “Reappointment” when a failed slot is rescheduled); blank otherwise.

#	Item	Description
		Note: For Biometric Device Purchase without software installation (opted out), the Appointment Details section is not displayed – the page shows only the Service Request Details, Delivery Details and Payment Details sections.
5	Payment Details	The Payment Details section shall list all payment attempts for the request in chronological order: 1. Format: [Date & time] - [Payment channel (Transaction Ref No)] - [Status]. 2. Status – "OK" in green for successful payment; "Failed" in red, with the failure remarks shown in brackets. 3. Example: i. 01-06-2026 10:59am - RHB (260601000007) - Failed (IF - Wang di dalam akaun RHB anda TIDAK MENCUKUPI. 你的RHB银行余额不足.) ii. 01-06-2026 11:15am - RHB (260601000008) - OK Note: Failed payment attempts shall remain displayed for reference.
6	Fee Summary	A fee summary shall be displayed listing the fee for each service item under the request. Example: 1. Biometric Devices: RM 850.00/unit (No SST applicable) 2. Software Installation Fee: RM 54.00/request (inclusive of 8% SST)

2.3.2.4 eAuto UCD/ Back Office Portal > Invoice & e-Invoice Template

#	Item	Description
1	Invoice Template	The Invoice and e-Invoice templates shall remain unchanged from the existing format (refer STMS Invoice / e-Invoice as the reference template). The Description field under the line item table shall be left blank at the point of generation. The description content will be provided by Finance at a later stage and will be forwarded once received, for update into the respective templates. Finance-confirmed line-item Description values: Biometric Device Purchase row = "Dermalog Biometric Device"; Software Installation row = "Dermalog Software Installation Service". File Name: Biometric_Device_Invoice.pdf Template 1. Biometric Device Purchase and Free Installation

2.3.2.5 eAuto Back Office Portal > Biometric Device Purchase & Software Installation Listing

UI Reference: <https://www.figma.com/design/zDOWc012fHv6vLhyzsC2gK/eAuto---Backoffice?node-id=3562-10224&t=CwuEtmP02S2aFXkJ-4>

#	Item	Description
1	Filter	A "Search & Filter" panel shall be displayed with the following criteria: 1. Reference No. — free-text input. Similar as STMS Transaction No. behavior. 2. Company Name — free-text input. Similar as STMS Company Name behavior. 3. Date Requested From / Date Requested To — mandatory date range picker (defaults to the current month, e.g. 01/04/2026 – 30/04/2026). Min 1 day, Max 1 month. 4. Company ROC — free-text input. Similar as STMS Company ROC behavior. 5. Delivery Date From / Delivery Date To — optional date range picker. 6. Delivery Status — dropdown selection; default "All". a. All b. New c. Arranged d. Delivered 7. Appointment Date From / Appointment Date To — optional date range picker. Min 1 day, Max 1 month. 8. Installation Status — dropdown selection; default "All". a. All b. - c. Pending d. Completed e. Failed f. Cancelled g. Expired 9. Time Slot — dropdown selection; default "All". a. All b. - c. 10am – 12pm

		d. 2pm – 4pm 10. Payment Status – dropdown selection; default "All". a. All b. OK c. Failed 11. LHDN Response Status – dropdown selection; default "All". a. All b. OK c. Failed d. - 12. Button: i. Search – to filter the listing based on the criteria entered. Similar as STMS Search Now behavior. ii. Export – to export the filtered listing. Explain in 2.3.2.4 #3 iii. Reset – to clear all filter criteria back to default. Similar as STMS Reset behavior. iv. Appointment Calendar – to navigate to the Appointment Calendar page. Note: Text Field Validation – applies to ALL text fields in UCD and BO, including remarks: Accept: (1) all alphabetical characters (e.g. EAJNT); (2) all numerical characters (e.g. 1234); (3) all special characters (e.g. !@#\$%^); (4) all spacing applied (e.g. " spacing characters testing "). Block: (1) all Chinese characters (e.g. 测试); (2) all other non-English characters (e.g. Korean, Japanese). This exclusion applies to user-input fields only; system-generated display remarks (e.g. the RHB payment-failure message) may retain their original Chinese text. Quantity Field Validation – applies to all quantity/number-selector fields: accept integer values only; no additional maximum applies beyond the per-session appointment allocation caps (3 per session, 6 per day).
2	Listing Columns	The Software Installation Listing table shall display the following columns: 1. # – running number. 2. Reference No. – service request reference number. Format: SR{Year}{Month}{6_digits_running_no}

		e.g. SR67000001 3. Date Requested – request date and time, DD-MM-YYYY HH:MM (e.g. 01-06-2026 10:50). 4. Company Name – UCD company name. 5. Company ROC – UCD company registration number. 6. Device – number of biometric device(s) purchased (e.g. 1); "-" for a standalone Software Installation request with no device purchased. 7. Delivery Date – DD-MM-YYYY (e.g. 02-06-2026). 8. Installation Request – number of installation units requested (e.g. 1); "Yes" for a standalone Software Installation request with no specific unit count; "-" if no installation was requested. 9. Appointment Date – DD-MM-YYYY (e.g. 02-06-2026). 10. Time Slot – the selected appointment time slot (e.g. 10am – 12pm). 11. Payment Status – "OK" in green upon successful payment, "Failed" in red upon unsuccessful payment and "-" if no payment made. 12. LHDN Response Status – "OK" in green, "Failed" in red and "-" if not applicable. 13. Delivery Status – "New" in blue, "Arranged" in blue, "Delivered" in green; "-" for a standalone Software Installation request with no device purchased. 14. Installation Status – "Pending" in blue, "Completed" in green, "Failed" in red, "Cancelled", "Expired" and "-" in black. Note: "New" is a Delivery Status value only – it does not apply to Installation Status or Appointment Status. A paid-but-unscheduled installation (no appointment booked yet) displays Installation/Appointment Status as "-". 15. Date Completed – DD-MM-YYYY (e.g. 02-06-2026); "-" if not yet completed. 16. Remarks – system remarks where applicable, e.g. installation reason (e.g. Reappointment) 17. Special Remarks – "Yes"/"No" indicator in blue. 18. Action: i. "View" link to open the Software Installation Details Page of the selected request. ii. "Cancel" link – displayed while Installation Status is "-", "Pending" or "Failed" (BO-marked); not shown once Installation Status is "Completed", "Cancelled" or "Expired"
--	--	--

		(terminal states). Clicking Cancel displays a "Sure to cancel?" popup to double-confirm before the request is officially cancelled. Note: Cancellation eligibility by scenario (Payment = OK), per SRD EAINT-10960 section 2.3.2.5: 1. BDP + additional (paid) installation, Installation Status = Pending: Ops can cancel based on the installation appointment slot. 2. BDP + booked free installation, Installation Status = Pending: Ops can cancel based on the installation appointment slot. 3. BDP + no software installation booking, Installation Status = "-": Ops can cancel the transaction; cancelling this bare "-" (no-appointment) row sets Tx Status = Cancelled directly, Installation Status = Cancelled 4. Cancellation authority: Ops can cancel a BDP record; CSE cannot cancel a BDP transaction – CSE may only view/act on the bundled installation appointment (refer to section 2.2.3 Module Permission). 5. Tx roll-up: the only terminal (final) Tx Status values are Completed, Cancelled and Expired – once reached, no further status change occurs. Note: The listing shall be sorted by the latest Date Requested first.
3	Export	Clicking "Export" shall export the listing to an Excel (.xlsx) file: 1. All records in the current listing shall be exported. 2. File name format: Biometric_Device_Installation_List_YYYYMMDD.xlsx, where YYYYMMDD is the export date (e.g. Biometric_Device_Installation_List_20260602.xlsx).
4	Records per page	The listing shall display a maximum of 50 records per page. If no records are found, the listing shall display "No records found."

2.3.2.6 eAuto Back Office Portal > Biometric Device Purchase Details Page

UI Reference: <https://www.figma.com/design/zDOWc012fHv6vLhyzsC2gK/eAuto---Backoffice?node-id=4677-19485&t=MU20gZfD7ZaoSjAp-4>

#	Item	Description
1	Page Header	The page header shall display: 1. « Back button – to return to the Biometric Device Purchase Listing. 2. Service Request No. – displayed as "Service Request #" followed by the reference number (e.g. Service Request #SR67000001).
2	Request Details	The Request Details panel shall display: 1. Date Requested – DD-MM-YYYY HH:MMam/pm (e.g. 01-06-2026 10:50am). 2. Company Name – UCD company name. 3. Company ROC – UCD company registration number. 4. e-Invoice Submission Date – e.g. 01-06-2026 11:55am. 5. LHDN Response Status – "OK" in green / "Failed" in red, "-" if not applicable. 6. e-Invoice Validation Date – e.g. 01-06-2026 11:55am. 7. Button: i. Invoice – to view/download the invoice. ii. e-Invoice – to view/download the validated e-Invoice.
3	Shipping Details	The Shipping Details panel shall display: 1. Purchased Devices – number of units purchased (e.g. 1). 2. Delivery Status – "New" in blue, "Arranged" in blue, "Delivered" in green. 2. Delivery Date – DD-MM-YYYY; "-" until Ops updates the shipping details. 3. Delivery Order Number – the auto-generated Delivery Order Number (format YYYYMMDD/DP001); "-" until Ops updates the shipping details. 4. Consignment Number – displayed as a hyperlink once keyed in by Ops; "-" if not yet arranged. Redirect to citylink tracking page once clicked. 5. Recipient Name – the recipient name provided at checkout.

#	Item	Description
		6. Shipping Address – the delivery address provided at checkout (or the auto-populated showroom address). 7. Contact No – the contact number provided at checkout. 8. Button: i. Update Shipping Details – opens a popup for Ops to key in Delivery Date* (mandatory), Delivery Status* (mandatory dropdown: New / Arranged / Delivered) and Consignment Number* (mandatory free-text, similar to STMS Transaction No behavior). Upon clicking Update, the panel refreshes with the entered values and the Consignment Number becomes a hyperlink. Redirect to citylink tracking page once clicked. Rules: 1. Once the delivery status is updated, it cannot be reverted to a previous status (e.g., from "Arranged" back to "New"). 2. Once the status is "Arranged", the Delivery Date and Consignment Number fields will be greyed out and cannot be edited. The BO user can only change the status from "Arranged" to "Delivered".
4	Appointment Details	Where the request includes a bundled software installation, an Appointment Details panel shall display: 1. Installation Service – number of installation units (e.g. 1 units(s)). 2. Appointment Status – "Pending" in blue, "Completed" in green, "Failed" in red, "Cancelled", "Expired" and "-" in black. 3. Appointment Date – DD-MM-YYYY (e.g. 02-06-2026). 4. Time Slot – the booked appointment time slot (e.g. 10:00am – 12:00pm). Note: If no installation appointment exists for the request (e.g. installation was opted out, or a free installation has not yet been booked), the panel instead displays "No appointment record found" in red. 5. Date Completed – the date and time the installation was marked completed; DD-MM-YYYY HH:MM am/pm (e.g. 02-06-2026 03:54pm). Displayed once the Appointment Status is "Completed".

#	Item	Description
		6. Reason of Failed – refer to the reason why installation failed (e.g. Reappointment). Persists even after a subsequent reappointment returns the Appointment Status to "Pending"; on repeat failure, the stored reason is overwritten with the latest selection (no per-failure history is retained).
5	Payment Details	The Payment Details section shall list all payment attempts for the request in chronological order: 1. Format: [Date & time] - [Payment channel (Transaction Ref No)] - [Status]. 2. Status – "OK" in green for successful payment; "Failed" in red, with the failure remarks shown in brackets. 3. Fee line(s) shown below the payment attempts: i. Biometric Devices – RM 850.00 per unit (No SST applicable). ii. Software Installation Fee – RM 54.00, shown only when the request includes a chargeable/paid installation.
6	Special Remark	A "Special Remark" free-text box shall be displayed below Payment Details, together with an "Update Special Remark" button to save the entered remark. Similar to STMS "Update Special Remark".
7	Mark Completed	Clicking "Installation Completed »" shall display a confirmation popup: 1. Message: "Are you sure want to mark the installation appointment as completed?" 2. Button: i. No – to close the popup without changes. ii. Yes – to update the Appointment Status to "Completed". 3. Once updated, the Appointment Status shall be set to "Completed", and the UCD Portal's Service Request Details Page shall display a green banner – "Installation request completed." – at the top of the page.

#	Item	Description
8	Mark Failed	Clicking "Installation Failed »" shall display an "Installation Failed" popup: 1. Message: "Please select the reason causing the installation failed:" 2. Reason – radio selection: Reappointment / Laptop/PC Issues / Other. i. If "Other" is selected, a free-text box shall display for the user to key in the reason. Limit character 100. 3. Button: i. No – to close the popup without changes. ii. Yes – to update the Appointment Status to "Failed", capturing the selected reason. 4. Once updated, the Appointment Status shall be set to "Failed", the selected reason shall be captured under "Reason of Failed", and the UCD Portal's Service Request Details Page shall display a red banner – "Installation request failed." – at the top of the page. This reason display persists even after a subsequent reappointment returns the Appointment Status to "Pending"; on repeat failure, the stored reason is overwritten with the latest selection (no per-failure history is retained).
9	Concurrency Handling (Optimistic Lock)	When a second Ops user attempts to update the same record while another update by a different user is in progress, the system shall block the action with an "Error" popup: 1. Title: "Error". 2. Message (context-dependent): i. Update Shipping Details: "Unable to proceed. This record was just updated by another user." ii. Installation Status: "Unable to proceed. This Service Request has been completed, failed, expired or cancelled." 3. Button: OK – closes the popup and refreshes the page. (Refer to SRD EAIN-10960 section 2.3.2.6.) Example (Multi-user concurrency test):

#	Item	Description
		1. Update Shipping Details – Ops A and Ops B open the same BDP record and both attempt to update Shipping Details; Ops A saves first and succeeds, Ops B's save is blocked with the Error popup above and the page refreshes to show Ops A's update. 2. Installation Status = Completed vs. Failed – Ops A updates Installation Status to Completed and Ops B (updating the same record) to Failed; Ops A's update succeeds, Ops B is blocked and the page refreshes to show Completed. 3. Installation Status = Completed vs. Completed – Ops A's update succeeds; Ops B's concurrent update to Completed is blocked and the page refreshes to show Completed. 4. Installation Status = Failed vs. Completed – Ops A updates to Failed and proceeds to reschedule the appointment; Ops B's concurrent update to Completed is blocked and the page refreshes to show the latest status.

2.3.2.7 eAuto Back Office Portal > Appointment Calendar

UI Reference: <https://www.figma.com/design/zDOWc012fHv6vLhyzsC2gK/eAuto---Backoffice?node-id=3514-66085&t=CwuEtmP02S2aFXkJ-4>

#	Item	Description
1	Appointment Month Filter	The Appointment Calendar page shall display: 1. « Back button – to return to the Software Installation Listing. 2. Appointment Month – dropdown selection of month/year (e.g. Jun 2026). 3. Search button – to display the calendar for the selected month. 4. Add Appointment button – to open the "Add Appointment" dialog to create a new installation appointment (refer to Add Appointment Dialog below).
2	Appointment Calendar View	Calendar view by date, split into two time slots: 10:00am–12:00pm and 2:00pm–4:00pm. 1. Each time slot lists the confirmed appointments as a running numbered list of Company Names (e.g. "1. YENG AUTOMOBILE SDN BHD"). 2. A capacity counter per date and slot is displayed below the listed appointments (e.g. "Morning - 3", "Afternoon - 3 (Full)"), with the "(Full)" indicator shown in red once the slot reaches capacity. 3. The 3-per-slot (6/day) capacity applies to UCD Portal bookings only; the indicator is informational for CSE. 4. Each listed appointment has a Reschedule link (refer to Reschedule Appointment Dialog below). 5. Dates with no appointments display "-" for both time slots.
3	Reschedule Appointment Dialog	Upon clicking "Reschedule" against an appointment, a "Reschedule Appointment" dialog shall display: 1. Company Name – read-only, auto-filled from the selected appointment. 2. Installation Status – read-only; "Pending" and "Failed" in blue. 3. Installation Service Reference No. – read-only, auto-filled (e.g. SR67000001). 4. Current Appointment Date – read-only, showing the existing date and time slot (e.g. 04-06-2026 2:00pm – 4:00pm).

		5. New Appointment Date – mandatory date input. 6. Time Slot – mandatory radio selection: 10:00am – 12:00pm / 2:00pm – 4:00pm. 7. Button: i. Cancel – to close the dialog without changes. ii. Confirm – to submit the reschedule.
4	Add Appointment Dialog	Clicking "Add Appointment" shall open an "Add Appointment" dialog with the instruction: "Please enter the company name to add installation appointment." 1. Company Name – mandatory free-text input, with a "Search" button to look up the company. Similar to Proforma Invoice Company Name Search. 2. Reference No. – mandatory free-text input with a "Search" button. 3. Appointment Date – mandatory dropdown selection of the available appointment date. 4. Time Slot – mandatory radio selection: 10:00am – 12:00pm / 2:00pm – 4:00pm. 5. Button: i. Cancel – to close the dialog without changes. ii. Confirm – to submit and create the installation appointment.
